

RITRANSPARENCY REPORT 2017

Ontario Teachers' Pension Plan

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

Please see our 2016 Responsible Investing Report on Ontario Teachers' website here: https://www.otpp.com/investments/responsible-investing and also the booklet on our responsible investing principles downloadable from the same site.

We take this approach because it helps us to achieve the best risk-return trade-off for our members. Therefore, at Ontario Teachers':

- We objectively consider and evaluate environmental, social and governance ("ESG") risks alongside other risk factors in our investment decision-making and asset management processes because we believe they can materially impact the value of our investments.
- We are active owners and take a responsible approach in our asset management practices. We believe that good governance is fundamental to effective responsible investing.
- We continue to expand our knowledge, deepn our understanding, and evolve our practices by continually assessing current and emerging ESG risks. We share experience across the Plan by fostering a culture of thought leadership and collaboration.
- We seek clear and relevant disclosure of information that may assest us in making investment decisions.
- We collaborate with like-minded investors to more effectively execute Responsible Investing.

	SAM 12.1		Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year.	
	☑ Ac	ld Example		
		Topic or issue	Assess Private Equity Manager's ESG approach	
		Conducte by	Internal staff	
		Asset class	Private equity	
		Scope and process	We asked a prospective PE Partner to provide their ESG approach through our DDQ process. The PE firm was early in their development and thinking around ESG and how to incorporate these factors into their process. We provided them with examples of how other PE firms have integrated ESG factors into their investment approach.	
		Outcomes	The PE firm adopted an ESG policy and took steps to incorporate ESG into their overall investment approach.	
	☑ Ac	ld Example		
		Topic or issue	Assessment of Listed Equity external manager	
		Conducte by	Internal staff	
		Asset class	Listed Equity	
		Scope and process	ESG questions are incorporated in the RFP process to get an understanding of the manager's integration of ESG risks and opportunities into the investment decision making process. During the due diligence phase, a more detailed ESG survey is conducted to get to the heart of the ESG integration, including a review of the decision making structure, frameworks for integration, ownership of ESG risks, as well as systems used to help evaluate these risks. During ongoing monitoring of appointed managers, regular check-ins occur whereby questions are asked of names held in the portfolio, including a full review of the ESG score of the portfolio, as well as targeting a more fulsome review of the lowest scoring stocks.	
		Outcomes	We built a best practices manual that helps the team to gauge the quality and depth of ESG integration at the manager level that can be used going forward.

O We do not communicate the rationale to companies O Not applicable because we and/or our service providers do not abstain or vote against management recommendations Additional information. [Optional] Ontario Teachers' believes that transparency of our proxy votes is important. All votes are cast in a thoughtful manner and consistent with our stated proxy voting guidelines and corporate governance principles. To that end, we publish all our votes on our web site ahead of the annual meeting for anyone to view. In addition, we will provide a rationale to accompany any vote that is contrary to the management recommendation. PRI 2 For listed equities where you and/or your service provider have the mandate to issue (proxy) voting instructions, indicate the percentage of votes cast during the reporting year. ✓ We do track or collect this information 99% Specify the basis on which this percentage is calculated O of the total number of ballot items on which you could have issued instructions ✓ of the total number of company meetings at which you could have voted O of the total value of your listed equity holdings on which you could have voted Explain your reason(s) for not voting certain holdings Shares were blocked

Mandatory to Report, Voluntary to Disclose Descriptive Private Descriptive General Private PE 03.1 Typically, Ontario Teachers' Pension Plan has at least one board seat in nearly all of its direct private equity investments. In all cases, Ontario Teachers governance rights are prudent and commensurate with its level of ownership (for both minority and majority stakes). Good governance and promoting sustainable business practices is a core element of Teachers' investment beliefs. In our direct private equity holdings, we use our position of influence to advance good governance, spur on value creation and encourage responsible behaviour on all material environmental, social and governance issues by monitoring management and using direct influence. Our responsibility as fiduciaries is to evaluate and manage all risks carefully, and ensure that the Pension Plan is appropriately compensated for the risks taken PRI 2 Indicate if your organisation's investment guidelines for private equity refer to responsible investment. ✓ Our investment guidelines do refer to responsible investment O Our investment guidelines do not refer to responsible investment O We do not have investment guidelines PRI 1 During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments. ✓ Yes Describe your organisation's approach to incorporating ESG issues in private equity investment selection. The assessment of ESG risks and opportunities is an integral and consistent component of each of Ontario Teachers' direct private equity investment due diligence and decision making processes. Deal teams are responsible for identifying material ESG risks/opportunities, engaging third party consultants as appropriate to assist with the assessment, and raising key issues/findings to the investment underwriting committee alongside other risks. Ontario Teachers' internal responsible investing team is also engaged to assist with the review and assessment of ESG issues. When an investment is made, any material ESG risks and/or opportunities identified during the pre-investment stage are incorporated into value creation plans and ongoing monitoring. This approach is applied consistently across all industries and geographies, though the depth of the assessment will depend on the materiality of the ESG issues that are identified O No Mandatory PRI 1,3 Indicate what type of ESG information your organisation typically considers during your private equity investment selection process. Raw data from target company ☑ Benchmarks against other companies ✓ Sector level data/benchmarks ☐ Country level data/benchmarks Reporting standards, industry codes and certifications ☑ International initiatives, declarations or standards **☑** Engagements with stakeholders (e.g. customers and suppliers) ✓ Advice from external resources ✓ Other, specify Discussion with target management ☐ We do not track this information Describe how this information is reported to, considered and documented by the Investment Committee or similar. The due diligence and consideration of all key risks and opportunities, which includes ESG, are outlined in Investment Committee memos for each opportunity. Our IC memos include a section on top risks & mitigations as well as a seperate page specifically on ESG issues. All memos are presented to the Underwriting Committee by the deal team and areas of particular interest or note are discussed at length. Where risks or opportunities are key to the business, they will go on to be included as part of the key issues tracked throughout the investment and regular updates are provided during portfolio company monitoring review meetings PRI 1,2 Private Private Mandatory Gateway/Core Assessed Indicate whether your organisation incorporates ESG issues in investment monitoring of portfolio companies. ✓ Yes

At Cadillac Fairview, our heritage is one of seeing growth and opportunity in distinctive urban spaces. We pride ourselves on having the unique ability to transform a vision of unrealized possibility into a vibrant destination where people can work, shop, live and dine in exciting, immersive environments. And to do this effectively, we recognize the interrelationship between environmental, social and governance (ESG) practices and their impact on the communities in which we operate. We channel the capabilities and values of our people to positively impact these communities and influence change while creating value for our clients, partners and shareholder.

We have adopted a more comprehensive alignment of our Corporate Responsibility strategy with our overall business strategy and organizational values, with clear objectives and measures that provide focus and priority to current and new initiatives:

- 1. To reinforce and promote a culture where CF employees feel connected to our Responsibility strategy, and empowered to positively impact the communities in which they live and work. Example: Creation of the Responsibility Committee with cross-functional leadership across the organization.
- 2. To achieve the highest ESG industry standards relevant to our portfolio. Examples: third- party certifications (i.e. LEED, BOMA BEST, WELL), Benchmarks (i.e. GRESB), leadership and investment in testing new innovations (i.e. Industry leading energy management system).
- 3. To have a positive impact on the communities in which we operate, and engage our clients, customers and other stakeholders in full understanding of our commitment Examples: Creation of annual Corporate Responsibility report, ongoing engagement with our communities regarding operations and new developments.
- 4. To ensure we operate with good management practices and rigorous oversight to protect our employees, our clients, our shareholder, and other stakeholders. Examples: Cadillac Fairview's Enterprise Risk Management System, Code of Conduct, Occupational Health & Safety practices, Anti-Corruption & Bribery practices.

Occupier satisfaction and turnover	Target achieved	

☑ Governance

Target/KPI	Progress Achieved
Shareholder structure and rights	Fully compliant with regulatory and internal requirements
Disclosure (i.e., benchmarks)	Achieved target of top quartile ranking in GRESB (Global
CF Code of Conduct and associated mandatory Training - WHMIS Anti- Corruption & Bribery, etc.	Real Estate Benchmark) Fully compliant with regulatory and internal requirements

☐ We do not set and/or monitor against targets

PR 12.3 Additional information. [Optional]

Cadillac Fairview's property management practices recognize the interrelationship between environmental, social and governance (ESG) practices and their impact on the communities in which we operate. We channel the capabilities and values of our people to positively impact these communities and influence change while creating value for our clients, partners and shareholder. Each of the following objectives include many initiatives with associated targets:

- 1. To reinforce and promote a culture where CF employees feel connected to our Responsibility strategy, and empowered to positively impact the communities in which they live and work.
- 2. To achieve the highest ESG industry standards relevant to our portfolio.
- 3. To have a positive impact on the communities in which we operate, and engage our clients, customers and other stakeholders in full understanding of our commitment.
- 4. To ensure we operate with good management practices and rigorous oversight to protect our employees, our clients, our shareholder, and other stakeholders.

Key material risks and opportunities are identified through a materiality assessment that involved interviewing internal and external resources.

Select Example: Green at Work ®:

Green at Work® is Cadillac Fairview's national sustainability operational platform. Since its official launch in 2008, we have applied leading practices to integrate sustainability into our property management and operations. Our efforts focus on five pillars for maximum impact.

- 1. ENERGY: To reach our target of a 2.5% annual reduction in energy, we used energy conservation techniques, leading operational standards and efficiency technologies where possible. We aim to further reduce our consumption and demand in future years.
- 2. WASTE MANAGEMENT: Our goal is to divert 70-90% (target by asset type) of waste from landfill every year. We continue to meet this goal by implementing an industry-leading approach to waste diversion and waste minimization. We continue to strive for zero waste throughout our portfolio.
- 3. ENVIRONMENTAL PROTECTION: We are focused on minimizing adverse impacts from our activities, products and services on land, air and water. With this focus, we are able to meet our target of reducing water consumption by 2% annually.
- 4. RESPONSIBLE PROCUREMENT: Our contractors, consultants and suppliers play an essential role in our sustainability journey. Whenever possible, we use environmentally friendly products and services and follow best management practices at all properties.
- 5. STAKEHOLDER COLLABORATION: We believe in Building Sustainability Together™ by working with our clients, employees, suppliers and customers to share information about our ongoing green initiatives and involve all partners in the program's success

PR 17.3 Additional information.	

Cadillac Fairview channels the commitment and capability of our people to build and inspire social consciousness in our company and our communities, while delivering on our commitment to our stakeholders. We believe in building mutually beneficial relationships by contributing to the health and wellness of the communities in which we operate, either by our corporate involvement or through the services we provide in our shopping centres and office complexes, including the donation of in-kind space and employee time in assisting local fundraising efforts and groups.

- Philanthropy CF's National Charitable Donations Committee governs and evaluates our corporate community investments. The company's current philanthropic approach is directed at empowering and inspiring youth in our communities; enabling them to make a positive impact in their community and the lives of others.
- **Building Communities** Building Communities is CF's charitable program supporting employee volunteerism, where CF employees can request a corporate contribution of up to \$5,000 for a charity based on personal volunteer hours.
