

RITRANSPARENCY REPORT 2020

Ontario Teachers' Pension Plan (OTPP)

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

00 11.4	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

We assess managers' governance, strategy, risk management, and investment processes around ESG factors. At the selection stage we review $relevant\ policies,\ managers'\ responses\ to\ our\ DDQ,\ and\ disclosures.\ We\ conduct\ site\ visits\ to\ talk\ with\ staff.$

This includes understanding the accountability structure for ESG management, and the resources that the company has in place (dedicated staff, training, ESG expertise, etc.), policies, and reporting

We have a discussion of risk management processes including identification, materiality assessment and prioritization of ESG factors.

We ask managers for examples of how ESG integration impacted decisions, or catalysed actions

We review this with managers' at least annually.

LEA 03.3 Additional information. [Optional

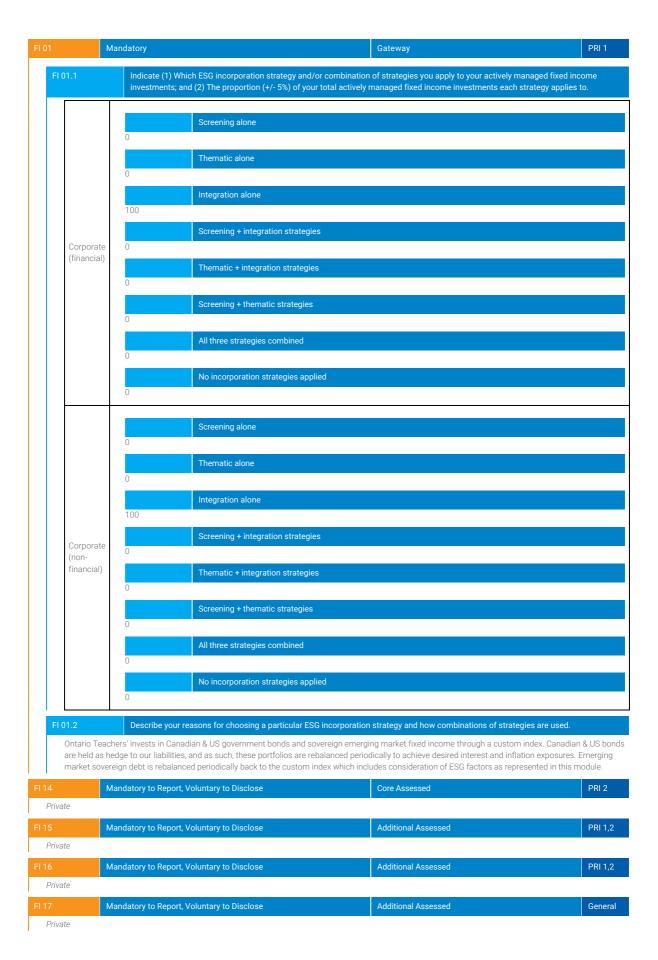

Ontario Teachers' has an integrated approach for engagements. Equity portfolio managers, in their systematic analysis of companies, may identify information gaps or heightened risks and engage with companies on the specific issues or issues as required. We take a top down approach on our passive equities identifying engagement targets based on focus areas for engagements, such as supply chain or climate change issues. Our proxy voting activity will also catalyse engagements with companies.

EA 04.1 Indicate whether you d	efine specific objectives for your organisation's engagement activities.
Individual / Internal staff engagements	 ○ All engagement activities ✓ Majority of engagement activities ○ Minority of engagement activities ○ We do not define specific objectives for engagement activities carried out by internal staff

The Responsible Investing Guidelines communicates the Plan's expectations of investment professionals, and provide a systematic framework for understanding and managing ESG factors. Investment professionals are expected to be aware of ESG factors and to evaluate their priority alongside all other Portfolio Risk factors considered as part of the investment process. The investment professionals who make decisions regarding investments have a process in place to ensure that they understand the materiality of the relevant risks posed by ESG factors and are able to make an informed judgment about their relevance to the investment decision. In doing so, investment professionals can enhance the information they have to help ensure that they will be adequately compensated for the risks they undertake in making investment decisions. O ur investment activities are not guided by a responsible investment policy O We do not have a responsible investment policy During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments. ✓ Yes Describe your organisation's approach to incorporating ESG issues in private equity investment selection. The assessment of ESG risks and opportunities is an integral and consistent component of each of Ontario Teachers' direct private equity investment due diligence and decision making processes. Deal teams are responsible for identifying material ESG risks/opportunities, engaging third party consultants as appropriate to assist with the assessment, and raising key issues/findings to the investment underwriting committee alongside other risks. Ontario Teachers' internal responsible investing team is also engaged to assist with the review and assessment of ESG issues. When an investment is made, any material ESG risks and/or opportunities identified during the pre-investment stage are incorporated into value creation plans and ongoing monitoring. This approach is applied consistently across all industries and geographies, though the depth of the assessment will depend on the materiality of the ESG issues that are identified. O No PRI 1,3 Indicate what type of ESG information your organisation typically considers during your private equity investment selection process. ☑ Raw data from target company ■ Benchmarks against other companies Sector level data/benchmarks ☐ Country level data/benchmarks ■ Reporting standards, industry codes and certifications ☑ International initiatives, declarations or standards $f oldsymbol{arphi}$ Engagements with stakeholders (e.g. customers and suppliers) ✓ Advice from external resources ✓ Other, specify Discussion with target management ☐ We do not track this information Describe how this information is reported to, considered and documented by the Investment Committee or similar. The due diligence and consideration of all key risks and opportunities, which includes ESG, are outlined in Investment Committee memos for each opportunity. Our IC memos include a section on top risks & mitigation as well as a separate page specifically on ESG issues. All memos are presented to the Underwriting Committee by the deal team and areas of particular interest or note are discussed at length. Where risks or opportunities are key to the business, they will go on to be included as part of the key issues tracked throughout the investment and regular updates are provided during portfolio company monitoring review meetings PRI 1,2 Private PRI 1 Private Mandatory Gateway/Core Assessed PRI 2 Indicate whether your organisation incorporates ESG issues in investment monitoring of portfolio companies PE 09.1 ✓ Yes

Our real estate portfolio is managed by Cadillac Fairview (CF), which is a wholly-owned subsidiary of Ontario Teachers'. We have worked closely with CF over the years to share best practices in Environmental, Social, Governance (ESG) and to ensure that responsible investing practices continue to have strategic priority in the organization.

CF has a heritage of seeking growth and opportunity in distinctive urban spaces. It prides itself on having the unique ability to transform a vision of unrealized possibility into a vibrant destination where people can work, shop, live and dine in exciting, immersive environments. To do this effectively, CF recognizes the interrelationship between ESG practices and their impact on the communities in which it operates. CF channels the capabilities and values of their people to positively impact these communities and influence change while creating value for their clients, partners, customers and shareholder.

CF has adopted a more comprehensive alignment of its Corporate Responsibility strategic plan with its overall business strategy and organizational values, with clear objectives and measures that provide focus and priority to current and new initiatives:

- To reinforce and promote a culture where CF employees feel connected to ESG, and empowered to positively impact the communities in which they live and work. Example: Creation of the Responsibility Committee with cross-functional leadership across the organization.-
- To achieve the highest ESG industry standards relevant to their portfolio. Examples: third- party certifications (i.e. LEED, BOMA BEST, WELL, Fitwel),
 Benchmarks (i.e. Global Real Estate Sustainability Benchmark), leadership and investment in testing new innovations (i.e. Industry leading energy management system).
- To have a positive impact on the communities in which it operates, and engage its clients, customers and other stakeholders in full understanding of the commitment. Examples creation of annual corporate responsibility report, and ongoing engagement with communities regarding operations and new developments.
- To ensure CF operates with good management practices and rigorous oversight to protect employees, clients, customers, shareholder, and other stakeholders. Examples: Cadillac Fairview's Enterprise Risk Management System, Code of Conduct, Occupational Health& Safety practices, and Anti-Corruption & Bribery practices.

Please see policy for further details.

Social example 3, description [OPTIONAL] CF implements programs and initiatives which monitor and measure the health, safety and wellbeing of building occupants (e.g. Indoor air quality measurements - tenants). PR 08.3 Describe how your organisation, and/or property managers, considers ESG issues in post-investment activities related to your property assets.

CF's commitment to best-in-class retail, office and mixed-use commercial spaces has transformed how they integrate ESG into each stage of the building's lifecycle.

During the property planning phase, CF:

Defines achievable ESG targets that add value to developments and meet client needs. A LEED preliminary evaluation is conducted.

- · Identifies ESG building opportunities before they break ground
- Ensures sustainability experts are included on every project to identify and assess sustainable building opportunities
- Fosters collaboration between CF development team, architects, consultants and contractors
- · Considerations for accessibility

During the property construction phase, CF:

- Uses sustainable building practices to reduce its environmental impact.
- · Limits energy, water, waste to landfill, raw material and carbon intensity of each project
- Ensures all practices meet regulatory requirements and highest level of health and safety standards
- Works with partners that demonstrate outstanding health and safety records
- Engages with clients to collaborate on environmentally-conscious decisions
- Engages other community stakeholder as active partners

During the property management phase, CF:

- Uses the five pillars of CF's national sustainability program, Green at Work®, to integrate environmental sustainability into building operation and maintenance practices (See section 12 for more details).
- Ensures properties are continuously monitored for emissions, waste output, energy and water use
- Ensures each property has a green team that consists of a cross-functional team of members ensuring sustainability is integrated into what we do.
- Achieves and maintain third-party green certifications (i.e. LEED and BOMA BEST).
- Ensures properties meet regulatory requirements and highest level of health and safety standards
- Engages key stakeholders (i.e. clients, owner, community) as active partners.
- Regularly assesses sustainability related technology and management best practices.
- Ensures CF properties align with brand and purpose

NOTE: ESG considerations include but are not limited to: Environmental site selection requirements; Environmental site development requirements; Sustainable construction materials; Water efficiency requirements; Energy efficiency requirements; Waste management plans at sites; Health and safety management systems at sites; Construction contractors comply with sustainability guidelines; and Resilient building design and orientation.

CF Code of Conduct and associated mandatory Training - WHMIS	Benchmark).	
Anti-corruption & Bribery, etc	Implemented measures to ensure fully compliant with regulatory and internal requirements.	

☐ We do not set and/or monitor against targets

PR 09 3

Additional information. [Optional]

CF manages material ESG aspects using various targets, programs and initiatives throughout the organization

Governance: ESG matters are governed at CF through the responsibility steering committee, which provides strategic input into the responsibility plan and reviews progress and results on various initiatives. The steering committee is supported by the responsibility management council which identifies ESG opportunities, supports cross-departmental coordination, reports on departmental progress and contributes to internal and external reporting. At an asset level, property green teams (comprised of property team members and building occupants) help identify various initiatives which support ESG aspects.

Social: CF's short-term social objectives include implementing an occupational health and safety program, ensuring responsible employment, investing in youth, maintaining the client experience and executing the "Building Communities" program. Building Communities is CF's charitable program supporting employee volunteerism, where CF employees can request a corporate contribution of up to \$5,000 for a charity based on personal volunteer hours. This year, CF contributed \$265,000 to the program, reaching its goal of \$265,000. Further to this, CF has pledged \$1.5 million through the annual CF Golf Classic to support the following three new charitable partners: CAMH, Covenant House and Holland Bloorview Kids Rehabilitation Hospital.

CF meets accessibility standards in the jurisdictions in which we operate. We also provide annual compliance training to employees relating to key policies. There are compliance courses on AODA (Accessibility for Ontarians with Disabilities Act), WHMIS (Workplace Hazardous Materials Information System) and the Cadillac Fairview Harassment, Discrimination and Workplace Violence policy. These courses are available online for all employees.

Environment: Green at Work® is CF's national award-winning environmental sustainability operational platform. Since its official launch in 2008, CF has applied leading practices to integrate sustainability into its property management and operations. These efforts focus on five pillars for maximum impact.

Energy: To reach CF's target of a 3% (AAA Office) and 2.5% (Retail and A Office) annual reduction in energy, CF used energy conservation techniques, leading operational standards and efficiency technologies where possible. CF aims to further reduce consumption and demand in future years.

In order to do this, CF analyses intensity by properties to establish targets. CF monitors short term and long term energy trending of intensity metrics to determine priority properties and benchmarks against the industry. CF also utilizes an advanced energy analytics program (Energy Smart Operations) to support ongoing operational excellence. The challenge in continually meeting these energy targets is they have already implemented many capital and operational energy reduction measures (over the last decade). As a result, continued reduction in energy consumption can be difficult.

Waste Management: CF has set an annual goal to divert 70-90% (target by asset type) of waste from landfill. CF successfully meets this goal by implementing an industry-leading approach to waste diversion and waste minimization. The organization continue to strive for zero waste throughout the portfolio. Waste targets and waste management initiatives are established through Green At Work®, which provides recycling amenities at all properties and education programs for clients. Waste data is collected through haulage reports and invoices, and contractors are required to submit reports that track waste data for specific construction projects.

Environmental Protection: CF is focused on minimizing adverse impacts from activities, products and services on land, air and water. With this focus, CF is able to meet the target of reducing water consumption by 2% annually. They analyse their water intensity by properties to establish targets. They monitor short term and long term trending of intensity metrics to determine priority properties and benchmarks against the industry.

Responsible Procurement: CF's contractors, consultants and suppliers play an essential role in its sustainability journey. Whenever possible, CF uses environmentally friendly products and services and follow best management practices at all properties.

Stakeholder Collaboration: CF believes in connecting with their clients, employees, suppliers and customers to share information about their ongoing green initiatives and involve all partners in the program's success.

Additional information. [Optional]

As responsible developers, CF ensures that important ESG aspects are systematically identified and considered in all development activities. The incorporation of ESG best practices and industry standards (i.e. LEED, WELL) into all aspects of designing, building and operating our properties relies upon committed people: sustainability experts, architects and consultants, operations team and the engineering firms and contractors required to demonstrate

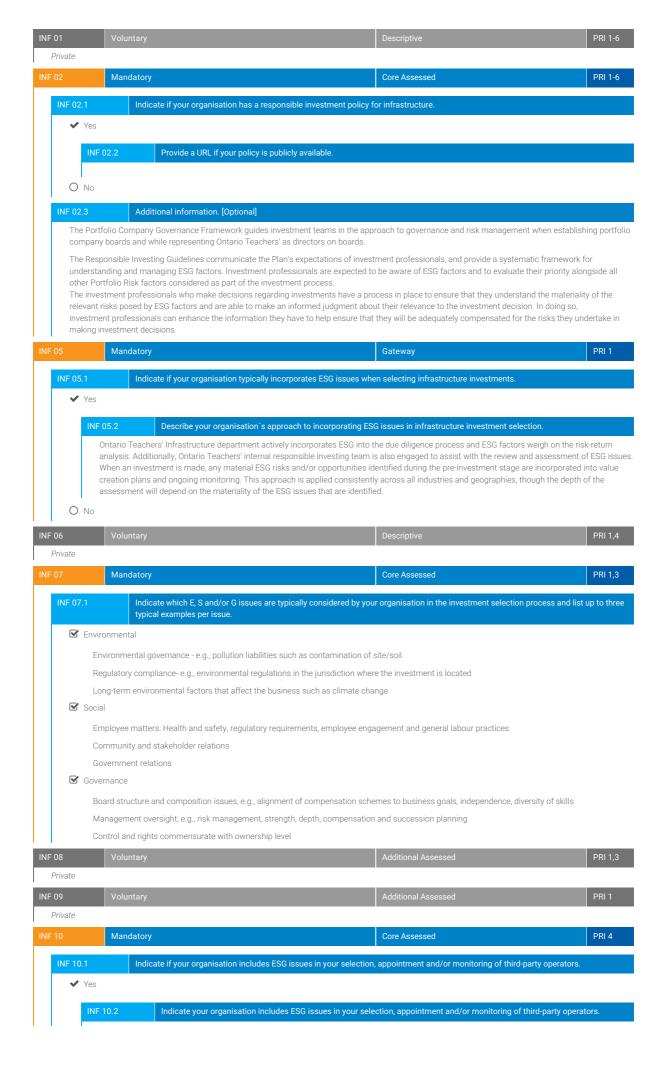

outstanding health & safety records, and minimize use of energy, water and non-renewable resources during construction. Through the development process, these project team members ensure the project is executed in accordance with existing regulations while accounting for and aligning with upcoming regulations / policies. CF's aim is to improve and meet the needs of communities in which they operate and as a result, development and redevelopment activities include community consultation.

PRI 2 Indicate the proportion of property occupiers your organisation, and/or your property managers, engaged with on ESG issues during the → >90% of occupiers O 50-90% of occupiers O 10-50% of occupiers O <10% of occupiers Indicate if the following practises and areas are typically part of your, and/or your property managers', occupier engagements. ☑ Distribute a sustainability guide to occupiers ☑ Organise occupier events focused on increasing sustainability awareness **☑** Deliver training on energy and water efficiency **☑** Deliver training on waste minimisation f arphi Provide feedback on energy and water consumption and/or waste generation ☑ Provide feedback on waste generation ☑ Carry out occupier satisfaction surveys ✓ Health and wellbeing of residents ✓ Offer green leases ✓ Other, specify Provide information on achievement of third-party industry standard (i.e., LEED or BOMA BEST). Additional information. [Optional]

The occupants of our managed buildings are engaged on ESG issues through many ways. Examples of property initiatives include but are not limited to:

- Office Green Councils consisting of key members of the landlord and tenants organizations working together to educate and make differences in landlord and tenant organizations.
- Office campaigns or ecofairs to educate on specific issues and building performance (i.e., energy, water, waste, air quality, etc.).
- Office occupant training regarding access tenant energy data in near to real time intervals.
- Office and retail events to educate or celebrate specific issues such as Earth Hour.
- Office and retail events to educate, promote or raise awareness of health and wellness (i.e. wellness fairs)
- Other communications via posters, elevator screens, emails, etc.
- $\bullet \ \ \text{Surveys and feedback sessions to understand occupant needs (i.e., wellness demands, etc.)}$
- CF engages clients on energy /after-hour audits to help identify energy savings opportunities through the identification of non-essential lighting and electronic signage which may be turned off after hours. The purpose of this exercise is to also inform clients about technologies they can use to reduce night time lighting, such as automatic lighting controls, motion sensors activated lighting and low-intensity light fixtures.
