

Rating Action: Moody's Ratings affirms Ontario Teachers' Pension Plan Board's Aa1 long-term issuer rating; outlook changed to stable from positive

02 Jun 2025

New York, June 02, 2025 -- Moody's Ratings (Moody's) affirmed the Aa1 long-term issuer rating and aa3 Baseline Credit Assessment (BCA) of Ontario Teachers' Pension Plan Board (OTPP). We also affirmed the backed Aa1 senior unsecured rating, the backed (P)Aa1 senior unsecured shelf rating and the backed Prime-1 commercial paper rating of Ontario Teachers' Finance Trust (OTFT), a wholly-owned subsidiary of OTPP. The outlook on OTPP and OTFT has been changed to stable from positive.

RATINGS RATIONALE

The affirmation of OTPP's aa3 BCA reflects the pension manager's strong liquidity and predictability of future cash flows and a pension obligation that is over-funded after applying our discount rate adjustments. OTPP reported a return of 9.4% in 2024 due to positive returns in public and private equities, inflation sensitive assets and credit. OTPP's credit strengths are offset by a high proportion of high-risk assets (as defined in our methodology) including growth in less-liquid and private market assets that help the fund meet its expected target return but reduces liquidity for creditors; a moderate level of leverage; and higher asset encumbrance and derivatives reliance compared to peers. On our adjusted basis, OTPP's funding ratio improved to 124% as of 31 December 2024 from 117% as of the same period the prior year.

The affirmation of OTPP's Aa1 long-term issuer rating reflects its aa3 BCA as well as two notches of uplift from asset coverage because of a statutory framework that ranks OTPP's creditor obligations senior to the pension manager's pension obligations. While OTPP's governing legislation does not explicitly define the priority of its unsecured creditors relative to its pension obligation, we believe these obligations rank ahead of payments because Schedule 1 to the Teachers' Pension Act places properly incurred liabilities undertaken for the benefit of members ahead of payments to beneficiaries. As a result, OTPP's creditor and guarantee obligations rank senior to the amounts that become due to the pension plan beneficiaries and pari passu with other senior unsecured obligations.

The affirmation of OTFT's backed Aa1 senior unsecured rating, the backed (P)Aa1 senior unsecured shelf rating and the backed Prime-1 commercial paper rating reflects the instrument-level guarantees provided by OTPP.

The outlook on OTPP and OTFT has been changed to stable from positive following the change in outlook of OTPP's sponsor and support provider, the Province of Ontario (Ontario, Aa3 stable) to stable from positive. OTPP and OTFT's ratings reflect a high assumption of extraordinary support from Ontario and an upgrade of Ontario's rating would have put upwards rating pressure on OTPP and OTFT's ratings. With the change in outlook on the Province of Ontario to stable, the upwards pressure on OTPP and OTFT's ratings are removed. As OTPP's sponsor, Ontario's Aa3 long-term issuer rating is a constraint on OTPP's aa3 BCA as OTPP's BCA cannot be higher than Ontario's Aa3 rating.

OTPP's long investment horizon is a considerable advantage since it affords it time to make portfolio shifts, particularly with less-liquid investments. OTPP's financial policies are broadly

conservative and the firm has good liquidity and risk management practices that mitigate the refinancing and counterparty credit risks associated with its use of leverage.

FACTORS THAT COULD LEAD TO AN UPGRADE OR DOWNGRADE OF THE RATINGS

OTPP's long-term issuer rating could be upgraded if the rating of the Province of Ontario, its support provider, was upgraded. The long-term issuer rating could also be upgraded if our view of OTPP's leverage were to remain below 10% for a sustained period of time.

OTFT's ratings could be upgraded following an upgrade of OTPP's ratings.

OTPP's long-term issuer rating could be downgraded if the pension manager demonstrates a substantial deterioration in its funding profile, or increases the encumbrance of its liquid assets or significantly increases its allocation to less-liquid and private market assets. The rating could also be downgraded if the pension manager's leverage were to consistently remain above 25%.
