

# Our pathway to net zero by 2050

## OUR ROLE

As an active and engaged investor, we use capital and influence to help accelerate towards a low-carbon future

## OUR IMPACT

- Lower greenhouse gas emissions
- Benefit people, communities, and portfolio companies
- Help companies to navigate the transition to a net-zero economy

How we'll get there:

### AMBITION

Rapidly reduce the intensity of our portfolio carbon footprint

Nearly half  
by 2025

Two-thirds  
by 2030

Impacts all our real assets, private natural resources, equity and corporate credit holdings across public and private markets, including external managers

### Accelerate green investing

Portfolio includes more than C\$30 billion in green investments as at June 30, 2021

Committed over C\$5 billion to climate and transition solutions in 2021 to date

## ENGAGEMENT

Work collaboratively with portfolio companies to tackle emissions head-on for a greater overall reduction

## ACCOUNTABILITY

Increase proportion of emissions covered by a net-zero transition plan

Report on our targets publicly and annually

## COORDINATED EFFORT

Pivot our asset class strategies to pursue opportunities that are both climate-smart and commercially attractive

Advocate for clear climate policies that enable the global transition to a net-zero economy

Partner with industry peers and organizations to effect global change

\* Compared to 2019 baseline year
